

Aerospace:

*Parts, Components,
and Logistics*

Worldwide Distributor: *Commercial and Military-Spec Aviation Supplies*

TPS Aviation

TPS is dedicated to providing superior quality products, excellent support, accurate, and up-to-date technical assistance to customers across the world.

TPS is a worldwide distributor of commercial and military-specification aerospace supplies. With offices and stocking facilities near major airframe assembly plants and airports, TPS supports many programs, including Just-In-Time (JIT), with industry leading service.

TPS's reputation as a quality supplier is represented by over 50 years of service and millions of ready-to-ship, fully-certified on-site stocked parts. TPS is the authorized distributor and stocking distributor to many of the major aerospace manufacturers and their subcontractors.

TPS's continued success is measured each day – with each and every delivery.

Logistics and Support

TPS professionals are available to handle all of your logistics needs. TPS is committed to providing the necessary service and support to ensure that outbound shipments arrive on schedule and in excellent condition.

To ensure accurate data tracking, accounting, and documentation, TPS utilizes the latest data center infrastructure. All parts and products, received at TPS facilities, are categorized and legacy tracked to meet all compliance requirements.

Quality Assurance Program

Customers expect and appreciate TPS's commitment to the industry's *Total Quality Management* program. To ensure customers the highest possible quality and service, TPS maintains a thorough shipping and receiving inspection department. TPS personnel inspect, package and document all items for shipment.

FMS Operations

TPS supports Japan's FMS Program in an efficient, cost-effective manner by utilizing proven methods of freight forwarding, distribution, and transportation through direct strategic management.

TPS works closely with the United States Department of Defense and Foreign Defense Agencies to integrate and support a variety of FMS programs. With more than four

decades of FMS contracts, TPS continuously improves and enhances FMS systems and operations to meet or exceed all requirements. With a direct on-line interface to the ILCS System, TPS is able to access information at the Defense Automatic Addressing Systems Office (DAASO) to work seamlessly to support FMS programs.

Certifications and Awards (partial list)

ISO 9001:2008 Certified
AS9100 Rev C: Certified
Alenia Aermacchi: Approved Supplier
Allfast Fastening System: DQR-9000 level
BAE Systems Regional Aircraft:
Certificate of Approval
Boeing: Approved Supplier, and
Outstanding Performance Award
Boeing/NASA: Certification of Appreciation
Bombardier Aerospace: Qualified Supply
